10th annual proceedings

reliability physics

1972

Las Vegas, Nevada, April 5-7, 1972

Sponsored by
the IEEE Electron Devices Group and
the IEEE Reliability Group

IEEE Catalog No. 72CH0628-8-PHY
Library of Congress Catalog Card No. 76-180194

MANAGEMENT COMMITTEE

GENERAL CHAIRMAN ................................................. D. S. Peck, Bell Telephone Laboratories
VICE GENERAL CHAIRMAN ........................................... O. D. Trapp, Memorex
SECRETARY .............................................................. J. Vaccaro, USAF (RADC)
FINANCE ................................................................. J. H. Scott, Jr., RCA Laboratories
TECHNICAL PROGRAM ................................................ J. Partridge, MIT Draper Laboratory
PUBLICITY ............................................................... H. Lauffenburger, IIT Research Institute
REGISTRATION ............................................................. P. H. Eisenberg, Litton Systems
ARRANGEMENTS ......................................................... D. F. Barber, USAF (RADC)
PUBLICATIONS ............................................................. C. H. Zierdt, Jr., Bell Telephone Laboratories
EXHIBITS ........................................................................ L. Bucaria, Raytheon

ADVISORY BOARD

K. Zaininger, G-ED, IEEE
RCA Laboratories

J. J. Naresky, G-R, IEEE
USAF (RADC)

G. Parker, G-ED, IEEE
Intel

J. Vaccaro, G-R, IEEE
USAF (RADC)

PUBLISHED BY THE
ELECTRON DEVICES AND RELIABILITY GROUPS
OF THE
INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

Responsibility for the contents rests upon the authors and not upon the IEEE, the Groups, or its members.

Individual copies may be purchased at the Publications Sales Department, The IEEE, 345 East 47th Street, New York, New York 10017, for $12.00 per copy; a 25% discount will be allowed IEEE members. Request catalogue #: 72CH0628-8-PHY.

All rights, including translation, are reserved by the IEEE. Requests for republication permission should be addressed to the IEEE Editorial Department, 345 East 47th Street, New York, New York 10017. Abstracting is permitted with mention of source.

ED HAKIM SPELLBINDING HIS AUDIENCE.

THE AUDIENCE, AND ONLY ONE LOOKS ASLEEP.
SHOULDN'T YOU?
PLAN NOW
to attend the
1973 RELIABILITY PHYSICS
SYMPOSIUM
April 3, 4, 5 1973
Dunes Hotel, Las Vegas, Nevada
# TABLE OF CONTENTS

**KEYNOTE ADDRESS — Dr. George Heilmeier, DoDR&E**

"Reliability – Some Early Impressions of a Pentagon Newcomer" ........................................... 1

**NEW AND IMPROVED FAILURE — ANALYSIS TECHNIQUES**

*Chairman and Organizer: Arnie Lesk*

A PROCEDURE FOR THE EVALUATION AND FAILURE ANALYSIS OF MOS MEMORY CIRCUITS USING THE SCANNING ELECTRON MICROSCOPE IN POTENTIAL CONTRAST MODE  
S. K. Behera and D. P. Speer ................................................................. 5

THE USE OF CURRENT GAIN AS AN INDICATOR FOR THE FORMATION OF HOT SPOTS DUE TO CURRENT CROWDING IN POWER TRANSISTORS  
F. F. Oettinger and S. Rubin ................................................................. 12

SCREENING TECHNIQUES FOR INTERMITTENT SHORTS  
R. E. McCullough .................................................................................. 19

LASER SCANNING FOR INTEGRATED CIRCUIT TESTING  
R. E. McMahon ...................................................................................... 23

“Prediction of IC and LSI Performance by Specialized Vibration/Detection Test for Presence of Conductive Particles”.  
B. T. French, J. E. Mann and G. E. Ereckson ........................................... 26

“AS. E. M. Surface Voltage Measurement Technique”.  
R. P. Beaulieu, C. D. Cox and T. M. Black .............................................. 32

**DESIGN AND PROCESS CONTROL FOR RELIABILITY, AND MICROWAVE DEVICES**

*Chairman and Organizer: Jim Cunningham*

MOS/LSI CIRCUIT DESIGN: DESIGNING IN RELIABILITY  
H. W. Van Beek ..................................................................................... 36

RELIABILITY IMPROVEMENT BY PROCESS CONTROL  

AN EXPERIMENTAL MODEL OF THE MICROELECTRONIC ULTRASONIC WIRE BONDING MECHANISM  
G. G. Harman and K. O. Leedy ............................................................. 49

RELIABILITY OF MICROWAVE MIXER DIODES  
W. J. Moroney and Y. Anand .................................................................. 57

DIAMOND HEAT SINK FOR HIGH RELIABILITY IMPATT  
Y. Fukukawa, M. Shinoda, Y. Toyama, M. Yamamoto, S. Yoshioka and K. Kazetani ................................................................. 64

“Reliability Improvement With New Passivation of Solid Encapsulated Transistors”.  
E. A. Herr ................................................................................................... 69
# RELIABILITY OF PLASTIC — ENCAPSULATED DEVICES

**Chairman and Organizer: Jayne Partridge**

**Moderator: A. A. Procassini**

DEGRADATION ANALYSIS OF INFRARED AND VISIBLE OPTOELECTRONIC DEVICES
J. Lebailly, C. Gouin, and A. Desombre ................................................................. 126

THE EFFECTS OF DEVICE CONFIGURATION IN THE DEGRADATION OF GaP RED
LIGHT EMITTING DIODES
R. L. Hartman and M. Kuhn .................................................................................. 137

BONDING AND METALLIZATION
Chairman and Organizer: Jim Black

RELIABILITY IMPROVEMENT OF WIRE BONDS SUBJECTED TO FATIGUE
STRESSES
K. V. Ravi and E. M. Philofsky ........................................................................ 143

RELIABILITY OF MOLYBDENUM THIN FILMS IN HUMID ATMOSPHERES
A. Hornung ........................................................................................................ 149

PURPLE PLAGUE AND GOLD PURITY
C. W. Horsting .................................................................................................. 155

A STATISTICAL MODEL FOR ELECTROMIGRATION - INDUCED FAILURE IN
THIN FILM CONDUCTORS
J. D. Venables and R. G. Lye ............................................................................. 159

EFFECTS OF COMPLEX ALLOY ADDITIONS ON ELECTROMIGRATION IN
ALUMINUM FILMS
A. Gangulee and F. M. d'Heurle ........................................................................ 165

“Electromigration in TiPdAu Conductors”.
R. C. Pitetti ....................................................................................................... 171

HYBRIDS, MULTI - LAYER BOARDS, AND PASSIVE COMPONENTS
Chairman and Organizer: John Seacord

THIN - FILM NICKEL - CHROMIUM RESISTOR FAILURES IN INTEGRATED CIR-
CUITS
V. C. Kapfer and J. J. Bart ............................................................................... 175

FAILURE CHARACTERISTICS OF THIN - FILM CAPACITORS
J. S. Fisher ......................................................................................................... 183

MULTI - LAYER - BOARD PLATED - THROUGH - HOLE FAILURE MECHANISMS
D. Grabbe ......................................................................................................... 188
