

2019 International Reliability Physics Symposium Corporate Patron Form

Why should you be a Corporate Patron of the IRPS 2019, to be held March 31 – April 4 at the Hyatt Regency in Monterey, California?

- Let your customers know that your company is a leader in semiconductor device and systems reliability.
- Reach the niche market of microelectronics reliability engineers participating in the Symposium.

For more than 50 years, the International Reliability Physics Symposium (IRPS) has been the premier conference for engineers and scientists to present new and original work in the area of microelectronics reliability. Drawing participants from the United States, Europe, Asia, and other parts of the world, IRPS seeks to understand the interplay between the reliability of semiconductor components, integrated circuits, and microelectronic assemblies through an improved understanding of both the physics of failure as well as the application environment.
